

Director | San Diego

Albert Wang

Albert Wang is a Director at Qualcomm Ventures. His current investment areas are mobile, cloud, internet of things (IoT), and artificial intelligence (AI). Albert led the investments and currently serves as a board observer for AnyVision, AttackIQ, Avalanche, BlueStacks, Lookout, SiFive, SteelHouse and Workspot. Previously, Albert led the team's investments in Bracket Computing (acquired by VMware), Cavendish Kinetics (acquired by Qorvo), CurbSide (acquired by Rakuten), Gaikai (acquired by SONY), Ineda (acquired by Intel), MapR (acquired by HPE), PLUMgrid (acquired by VMware), and Ring (acquired by Amazon).

Prior to Qualcomm Ventures, Albert worked in various engineering and management roles in the wireless industry. Most recently, he worked at Lux Capital focusing on MEMS and nanotechnology startups. He also spent 4 years at Skyworks Solutions and managed the full lifecycle of several wireless chips that power the most popular smart-phones today. Albert received his MBA from the UCLA Anderson School of Management, his Ph.D. in Electrical Engineering from the University of Cincinnati, and his B.Sc. in Electrical Engineering from Zhejiang University.

Outside the office:

Albert is an enthusiastic sailor and a father to twin boys - an undertaking more challenging and rigorous than any he typically encounters at the office.
